Akash Kollabathula

SDET | Playwright + TypeScript Automation Engineer | AI-Assisted Testing

Hyderabad | kollabathula.akash.test@gmail.com | 9676996550 | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

SDET / Playwright Automation Engineer with **3 years of experience** designing and maintaining **Playwright and TypeScript** automation for web applications and **REST APIs**. Builds reliable **end-to-end UI and API test suites**, validates business workflows such as registration, booking and payments, and runs regression in **CI/CD pipelines on GitHub Actions and Jenkins**. Applies **AI-assisted testing** with Playwright agents, the **Playwright MCP Server**, **Claude** and GitHub Copilot to speed up test design, generation and maintenance.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, Java, SQL

Automation: Playwright, Playwright Test, E2E and UI Automation, Parallel Execution, Auto-Wait

Frameworks & Design: Page Object Model, Fixtures, Hooks, Data-Driven Testing, Trace Viewer

API Testing: REST API Testing, Playwright APIRequestContext, Postman, JSON Schema, SQL Verification

AI-Assisted Testing: Playwright Agents (Planner, Generator, Healer), Playwright MCP Server, Claude, GitHub Copilot

Testing: Functional, Regression, Smoke, Sanity, Integration, Test Case Design, Bug Reporting

CI/CD & Tools: GitHub Actions, Jenkins, Git, GitHub, Allure, Jira.

Methodology: Agile/Scrum, SDLC, Defect Lifecycle Management

PROFESSIONAL EXPERIENCE

Software Engineer – QA Automation · *HCL Technologies- Full Time* **Dec 2023 – Present**

- Developed and maintained the team's **Playwright Test + TypeScript** automation framework using Page Object Model, custom fixtures, hooks and reusable utilities, achieving **60%+ automation coverage** of critical workflows.
- Reduced regression execution time by implementing Playwright parallel workers and optimizing test execution.
- Improved test suite stability by reducing flaky tests from **25% to below 15%** through reliable locators, auto-waiting, web-first assertions and synchronization improvements.
- Integrated automation suites with **GitHub Actions and Jenkins** for automated regression execution, Allure reporting and artifact archival; managed defects in Jira.
- Automated **50+ REST API test cases** using Playwright `APIRequestContext` and Postman, validating status codes, response payloads, JSON schema, API contracts and database records.
- Leveraged **Playwright MCP Server and Planner, Generator and Healer agents** for browser exploration, scenario identification, locator discovery and test generation. Used **Claude and GitHub Copilot** for code suggestions, refactoring and debugging, reducing test authoring time by approximately **40%**.
- Improved defect investigation by attaching Playwright traces, screenshots, videos and execution artifacts to Jira defects, accelerating defect resolution by approximately**30%**
- Participated in sprint planning, stand-ups and retrospectives with developers and product teams to clarify requirements

PROJECT

Builder Management Tool · *Real-time Plot Management and Booking Web Platform* Playwright · TypeScript · POM · REST API · SQL · Jira

- Worked on a web-based property management platform supporting customer registration, sign-in and property discovery through plot availability searches across towers, buildings and floors.
- Covered end-to-end property booking workflows, including booking confirmation, customer and booking ID validation, and advance payments followed by scheduled installments.
- Tested the platform's REST APIs with Playwright `APIRequestContext` and Postman, validating status codes, response payloads and negative scenarios alongside the UI flows.
- Used **GitHub Copilot,Agents** to draft tests for new features and update locators after UI changes; ran regression and smoke suites in CI and reported failures with traces.

EDUCATION

B.Tech – Computer Science and Engineering **2019 – 2023**

Vignan Institute of Information Technology, Visakhapatnam CGPA: 8.2 / 10
